

## **FLEA FUMIGATION CHECKLIST**

Plan to be out of home for at least four hours and prepare to stay off the treated area until insecticide is thoroughly dried.

Strip the beds and remove slipcovers from furniture, wash with hot water.

Vacuum and wash any pet beds or furniture, bedding that is put in the trash should be put in a sealable plastic bag and disposed in an exterior trash can.

Dispose of vacuum cleaner bags in a trash container outside your home, close tightly. If using a vacuum with a reusable bag, empty contents into container outside your home, close tightly, and discard. Wash reusable bag in hot water.

Mop all wood, tile and vinyl floors.

Cover and store any open food products, dishes or utensils before service is rendered.

As much as possible, remove all movable items from the floor to give our technician as much unobstructed access as possible to the floors and carpeting.

Have your pets treated for fleas by a professional (veterinarian or groomer) at the same time that we will be treating your home.

Remove all caged pets (birds, reptiles, hamsters) before service is rendered. Pet food containers and bowls should be covered or stored away. Fish tanks are to be covered with plastic wrap, and pumps turned off until reoccupying home.
